FINANCIAL INSTRUMENTS

A financial asset or a financial liability is recognised only when the entity becomes a party to the contractual provisions of the instrument.

Financial instruments are initially recognised at cost, which is the transaction price.

Investments in shares, subsidiaries or participating interests are subsequently measured at cost less impairment.

Derivatives are subsequently measured at the cost plus any transaction costs not immediately recognised in profit or loss less any impairment losses recognised to date. This is allocated to profit or loss over the term of the contract on a straight-line basis, unless another systematic basis of allocation is more appropriate.

Other financial instruments are subsequently measured at the cost plus any transaction costs not immediately recognised in profit or loss, plus accumulated interest income or expense recognised to date, less all repayments of principal or interest to date, less impairment.

Financial assets are reviewed for objective evidence of impairment at the end of each reporting date. If there is objective evidence of impairment, an impairment loss is recognised in profit or loss immediately.

Any reversals of impairment are recognised in profit or loss immediately.
