Taxation

The yearly charge for taxation is based on the profit for the year and is calculated with reference to the tax rates applying at the balance date. Deferred taxation is calculated on the differences between the company's taxable profits and the results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements. Full provision for deferred tax assets and liabilities is provided at current tax rates on differences that arise between the recognition of gains and losses in the financial statements and their recognition in the tax computation. Deferred tax assets are recognised to the extent that they are recoverable, that is, on the basis of all available evidence, it is more likely than not that there will be suitable tax profits from which the future reversal of the underlying timing differences can be deducted. Any assets and liabilities recognised have not been discounted.
