Notes to the financial statements (continued) Financial year ended 30 November 2025

Depreciation

Depreciation is calculated so as to write off the cost or valuation of an asset less its residual value over the useful economic life of that asset as follows:

If there is an indication that there has been a significant change in depreciation rate useful life or residual value of tangible assets the depreciation is revised prospectively to reflect the new estimates.

Impairment

A review for indicators of impairment is carried out at each reporting date with the recoverable amount being estimated where such indicators exist. Where the carrying value exceeds the recoverable amount the asset is impaired accordingly. Prior impairments are also reviewed for possible reversal at each reporting date.

When it is not possible to estimate the recoverable amount of an individual asset an estimate is made of the recoverable amount of the cash-generating unit to which the asset belongs. The cash-generating unit is the smallest identifiable group of assets that includes the asset and generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets.
