### 1. General Information

Dublin which is also the principal place of business of the company. The principal activity of the company is the sale and installation of audit visual and electrical equipment. The financial statements have been presented in Euro (€) which is also the functional currency of the company.

### 2. Summary of Significant Accounting Policies

The following accounting policies have been applied consistently in dealing with items which are considered material in relation to the company's financial statements.

#### Statement of compliance

The financial statements of the company for the year ended 31 December 2025 have been prepared in accordance with the provisions of FRS 102 Section 1A (Small Entities) and the Companies Act 2014.

#### Basis of preparation

The company qualifies as a small company as defined by section 280A of the Companies Act 2014 in respect of the financial year, and has applied the rules of the 'Small Companies Regime' in accordance with section 280C of the Companies Act 2014 and Section 1A of FRS 102.

#### Turnover

Turnover comprises the invoice value of goods supplied by the company, exclusive of trade discounts and value added tax.

#### Goodwill

Purchased goodwill arising on the acquisition of a business represents the excess of the acquisition cost over the fair value of the identifiable net assets including other intangible fixed assets when they were acquired. Purchased goodwill is capitalised in the Balance Sheet and amortised on a straight line basis over its economic useful life of 6 years, which is estimated to be the period during which benefits are expected to arise. On disposal of a business any goodwill not yet amortised is included in determining the profit or loss on sale of the business.

#### Tangible assets and depreciation

Tangible assets are stated at cost or at valuation, less accumulated depreciation. The charge to depreciation is calculated to write off the original cost or valuation of tangible assets, less their estimated residual value, over their expected useful lives as follows:

Fixtures, fittings and equipment	-	20% Straight line
----------------------------------	---	-------------------

The carrying values of tangible fixed assets are reviewed annually for impairment in periods if events or changes in circumstances indicate the carrying value may not be recoverable.

#### Stocks

Stocks are valued at the lower of cost and net realisable value. Cost comprises expenditure incurred in the normal course of business in bringing stocks to their present location and condition. Full provision is made for obsolete and slow moving items. Net realisable value comprises actual or estimated selling price (net of trade discounts) less all further costs to completion or to be incurred in marketing and selling.

#### Trade and other debtors

Trade and other debtors are initially recognised at fair value and thereafter stated at amortised cost using the effective interest method less impairment losses for bad and doubtful debts except where the effect of discounting would be immaterial. In such cases the receivables are stated at cost less impairment losses for bad and doubtful debts.

#### Trade and other creditors

Trade and other creditors are initially recognised at fair value and thereafter stated at amortised cost using the effective interest rate method, unless the effect of discounting would be immaterial, in which case they are stated at cost.

# NOTES TO THE ABRIDGED FINANCIAL STATEMENTS

for the financial year ended 31 December 2025

### Taxation and deferred taxation

Current tax represents the amount expected to be paid or recovered in respect of taxable profits for the financial year and is calculated using the tax rates and laws that have been enacted or substantially enacted at the Balance Sheet date.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay more tax in the future, or a right to pay less tax in the future. Timing differences are temporary differences between the company's taxable profits and its results as stated in the financial statements.

Deferred tax is measured on an undiscounted basis at the tax rates that are anticipated to apply in the periods in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

### Government grants

Revenue grants are credited to the Profit and Loss Account when received.

### Foreign currencies

Monetary assets and liabilities denominated in foreign currencies are translated at the rates of exchange ruling at the Balance Sheet date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated at the rates of exchange ruling at the date of the transaction. Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The resulting exchange differences are dealt with in the Profit and Loss Account.

### Ordinary share capital

The ordinary share capital of the company is presented as equity.
