Notes to the Abridged Financial Statements
for the financial year ended 28 February 2025

Taxation

The charge for taxation is based on the result for the financial year and is calculated with reference to the tax rates applying at the financial year end date in the jurisdiction where the tax is applied. Deferred taxation is calculated on the differences between the company's taxable profits and the results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements. Full provision for deferred tax assets and liabilities is made at current tax rates on differences that arise between the recognition of gains and losses in the financial statements and their recognition in the tax computation, including differences arising on the revaluation of fixed assets. Deferred tax assets are recognised only to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits.

3. Significant accounting judgements and key sources of estimation uncertainty

The directors consider the accounting estimates and assumptions below to be its critical accounting estimates and judgements:

Going concern

The directors have reviewed the financial position of the company for a period of at least twelve months from the date of the approval of the financial statements.

The company is dependent on the continued support of its group companies and related parties. The directors have a reasonable expectation that future operating cash flows, together with the ongoing financial support of the aforesaid sources, mean that the company will have adequate cash to fund it for the foreseeable future.

On this basis, the directors believe that it is appropriate for the financial statements to be prepared on a going concern basis. The financial statements do not include any adjustments that would result from a withdrawal of the continued support of its group companies and related parties.

Impairment of financial assets

At the end of each reporting period, the company assesses whether there is objective evidence of impairment of any financial assets measured at cost or amortised cost, including investments, loans, trade debtors and cash. If there is objective evidence of impairment, impairment losses are recognised in the Profit and Loss Account in that financial year.
