Notes to the abridged financial statements Financial year ended 28 February 2025

1. General information

Daz Check Ltd is a limited company incorporated in the Republic of Ireland (Registered no 574106). The registered office is Narin Road, Glenties, Co. Donegal. The company operates in the electricity board.

2. Accounting policies and measurement bases

Basis of preparation

These statutory financial statements have been prepared in accordance with Companies Act 2014 (as amended), Micro Companies Regime and The Financial Reporting Standard applicable to the Micro-entities (FRS 105). The directors have done so on the basis that the company qualifies as a micro company in accordance with section 280D of the Companies Act 2014 (as amended) and therefore is entitled to prepare the financial statements in accordance with the micro companies regime.

The financial statements have been prepared on the historical cost basis.

The financial statements are prepared in Euro, which is the functional currency of the entity.

Turnover

Turnover is measured at the fair value of the consideration received or receivable for goods supplied and services rendered, net of discounts and Value Added Tax.

Revenue from the sale of goods is recognised when the significant risks and rewards of ownership have transferred to the buyer, usually on despatch of the goods; the amount of revenue can be measured reliably; it is probable that the associated economic benefits will flow to the entity and the costs incurred or to be incurred in respect of the transactions can be measured reliably.

Tangible assets

Tangible assets are measured initially at cost, and are subsequently stated at cost less accumulated depreciation and impairment losses.

Depreciation

Depreciation is calculated so as to write off the cost or valuation of an asset, less its residual value, over the useful economic life of that asset as follows:

Fittings fixtures and equipment - 12.50% straight line

If there is an indication that there has been a significant change in depreciation rate, useful life or residual value of tangible assets, the depreciation is revised prospectively to reflect the new estimates.

Impairment

A review for indicators of impairment is carried out at each reporting date, with the recoverable amount being estimated where such indicators exist. Where the carrying value exceeds the recoverable amount, the asset is impaired accordingly. Prior impairments are also reviewed for possible reversal at each reporting date.

When it is not possible to estimate the recoverable amount of an individual asset, an estimate is made of the recoverable amount of the cash-generating unit to which the asset belongs. The cash-generating unit is the smallest identifiable group of assets that includes the asset and generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets.
