Future Developments

Principal Risks & Uncertainties

In common with many companies operating in Ireland in this sector, the company faces increasing operational costs. The directors are of the opinion that the company is well positioned to manage these costs.

Financial Risk Management

Through financial instruments held the company's operations exposes it to a variety of financial risks that include price risk, credit risk, liquidity risk and interest rate risk. The company does not use derivative financial instruments to manage financial risk and no hedge accounting is applied.

Price Risk

The company is exposed to the price risk of commodities through its operations. The directors believe that the cost of managing this risk is in excess of the potential benefits given the size of the company. The directors, however, review the appropriateness of this policy on an annual basis.

Credit Risk

The company requires that appropriate credit checks are carried out on new customers before sales are made. All customers have individual credit limits that are reviewed on an ongoing basis by the Board. Provisions for bad debts are made on historical evidence and any new events which might indicate a reduction in the recoverability of cash flows.

Liquidity Risk

The company maintains a mix of long and short term finance to ensure the company has sufficient funds available to meet all obligations as they fall due.

Directors' and Secretary's Interests

The directors' and secretary's interests in the share capital of the company at the beginning and end of the year were as follows:

The directors have acknowledged their responsibility for ensuring compliance with the provisions of the European Communities (Late Payment in Commercial Transactions) Regulations 2012. It is the company's policy to agree payment terms with all suppliers and adhere to these payment terms.

Accounting Records

The directors acknowledge their responsibilities under Sections 281 to 285 Companies Act 2014 to keep adequate accounting records for the company.

In order to secure compliance with the requirements of the Act, the company has employed competent accounting personnel with appropriate expertise and the provision of adequate resources to this financial function.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31ST OCTOBER 2025

ACCOUNTING POLICIES (Contd.)

f) Value Added Tax

Sales, cost of sales and overheads are shown net of Value Added Tax.

g) Foreign Currencies

The accounts are expressed in Euro which is the functional currency of the company. Transactions during the year have been translated at the rate of exchange ruling at the date of the transaction.

h) Leases

Where tangible assets are financed by leasing arrangements which give rights approximating to ownership (finance leases), they are treated as if they had been purchased outright at the present values of the minimum lease payments; the corresponding obligations are shown in the balance sheet as finance leases.

The present value of the minimum payments under a lease is derived by discounting those payments at the interest rate implicit in the lease, and is normally the price at which the asset could be exchanged in an arm's length transaction.

Depreciation is calculated in order to write off the amounts capitalised over the estimated useful life of the assets by equal annual instalments.

The excess of total rentals under a lease over the amount capitalised is treated as interest, which is charged to profit and loss in proportion to the amount outstanding under the lease.

Leases other than finance leases are "operating leases" and the rentals thereunder are charged to profit and loss account on a straight line basis over the periods of the leases.

i) Pensions

The pension costs in the financial statements represent the contribution payable by the company during the year.

The company does not operate a defined benefit scheme and the regular cost of providing retirement benefits is charged to the Profit & Loss Account as it is paid.

j) Related Party Transactions

The company discloses transactions with related parties which are not wholly owned within the same group.

FOR THE YEAR ENDED 31ST OCTOBER 2025

ACCOUNTING POLICIES (Contd.)

k) Contingencies

Contingent liabilities arising as a result of past events are not recognised when:

- i) It is not probable that there will be an outflow of resources or that the amount cannot be reliably measured at the reporting date, or
- ii) When the existence will be confirmed by the occurrence or non-occurrence of uncertain future events not wholly within the company's control.

Contingent liabilities are disclosed in the financial statements unless the probability of an outflow of resources is remote.

Contingent assets are not recognised. Contingent assets are disclosed in the financial statements when an inflow of economic benefit is probable.

l) Dividend Distribution

Dividend distribution to equity shareholders are recognised as a liability in the company's financial statements in the period in which the dividends are approved by the equity shareholders. These amounts are recognised in the statement of changes in equity.

m) Taxation

The company is managed and controlled in the Republic of Ireland and, consequently, is tax resident in Ireland.

i) Current Tax

Current tax is calculated on the profits of the period. Current tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the balance sheet date.

ii) Deferred Tax

Deferred tax arises from timing differences that are different between taxable profits and total comprehensive income stated in the financial statements. These timing differences arise from the inclusion of income and expenses and tax assessments in periods different from those in which they are recognised in financial statements.
